Wilson Pradana Damanik

Menambahkan logika delete

```kotlin
            }

            val btnDelete = ImageButton(requireContext()).apply {
                setImageResource(android.R.drawable.ic_menu_delete)
                setBackgroundColor(Color.TRANSPARENT)
                layoutParams = LinearLayout.LayoutParams(
                    ViewGroup.LayoutParams.WRAP_CONTENT,
                    ViewGroup.LayoutParams.WRAP_CONTENT
                )
            }

            btnDelete.setOnClickListener {
                val dbDel = Lite(requireContext()).writableDatabase
                dbDel.execSQL( sql: "DELETE FROM tb_kalimat WHERE indo = ? AND eng = ?", arrayOf(indo, eng))
                dbDel.close()
                listContainer.removeView( view: this)
                Snackbar.make(requireView(), text: "Data dihapus", Snackbar.LENGTH_SHORT).show()
            }

            addView(tvIndo)
            addView(tvEng)
            addView(btnDelete)
        }

        listContainer.addView(itemLayout)

    } while (cursor.moveToNext())
}
```
